
FOR IMMEDIATE RELEASE

Winter Storm Advisory

DENVER, CO — April 22, 2013 — Denver International Airport (DIA) is experiencing a winter storm.

Snow began falling at DIA at about 11:22 a.m. The airport is expecting between 3-6 inches of total accumulation through about 4 a.m. tomorrow, with additional flurries expected in the morning.

The airlines are currently in full deicing mode, which means passengers should expect to spend a little longer on the aircraft before departing.

Snow-removal crews are in place and clearing runways, taxiways and landside roads as needed. DIA has more than 250 pieces of snow-removal equipment and more than 500 trained snow-removal personnel. Peña Boulevard is wet and being treated as needed.

Travel Tips for Passengers

- Please check your flight status before heading out to the airport with your airline or on www.flydenver.com.
- Drive with caution and allow extra time when heading to the airport.
- A good rule of thumb is to be inside the airport two hours prior to flight departure time. This should allow for plenty of time to navigate flight check-in, security lines and travel to the gate.
- DIA recommends passengers download the free FlySmart travel app for the Blackberry, iPhone and Android. FlySmart Airport is the only travel app that features content downloaded directly from www.flydenver.com.

Denver International Airport is the 10th-busiest airport in the world and the fifth-busiest airport in the United States. With 50 million passengers traveling through the airport each year, DIA is one of the busiest airline hubs in the world's largest aviation market.

DIA is the primary economic engine of the state of Colorado, generating more than \$22 billion for the region annually.
